Assignment 1

1.Create a table listing 5 key cybersecurity terms (such as threat, vulnerability, risk, asset, attack vector) and write a one-line definition for each in your own words.

Ans-

Sr. No.	Term	One-line Definition
1	Threat	Anything that can potentially cause harm to a computer system, network, or data.
2	Vulnerability	A weakness in software, hardware, or configuration that an attacker can exploit.
3	Risk	The possibility and potential impact of a threat exploiting a vulnerability.
4	Asset	Anything valuable that needs protection, such as data, computers, accounts, or servers.
5	Attack Vector	The method or path an attacker uses to reach and compromise a target.

2.Research and find a real-world news article from the last 2 years about a major cyberattack on an Indian company or app (for example, a breach involving Zomato, Paytm, or IRCTC). Summarize what happened and identify one threat, one vulnerability, and one risk mentioned in the incident.

Ans-Salarpuria Sattva Group — Ransomware Claim (2025)

Salarpuria Sattva Group, one of India's largest real estate developers, appeared on a ransomware group's dark web leak site in 2025. The claim was recorded in threat intelligence tracking systems. The company has not issued a comprehensive public disclosure, and the attack's scope, impact, and authenticity remain unconfirmed in public reporting.

Date: 2025 (exact date undisclosed)

Sector: Real estate and commercial property

Location: Bengaluru, Karnataka, India

Attack Type: Ransomware — dark web leak site claim recorded in threat intelligence tracking

Status: No comprehensive public disclosure from the company

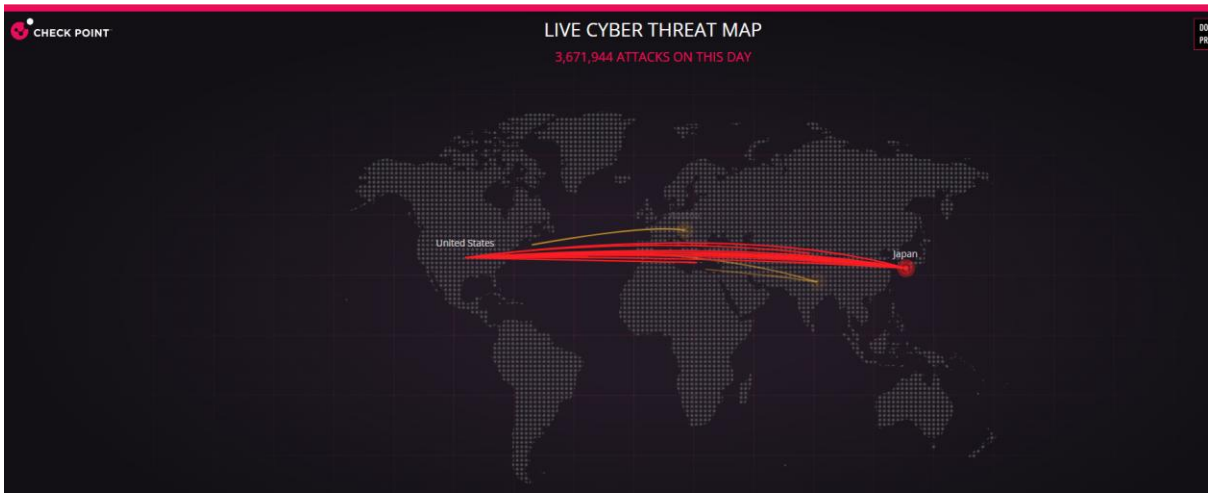

CIA Impact: Unconfirmed in public reporting

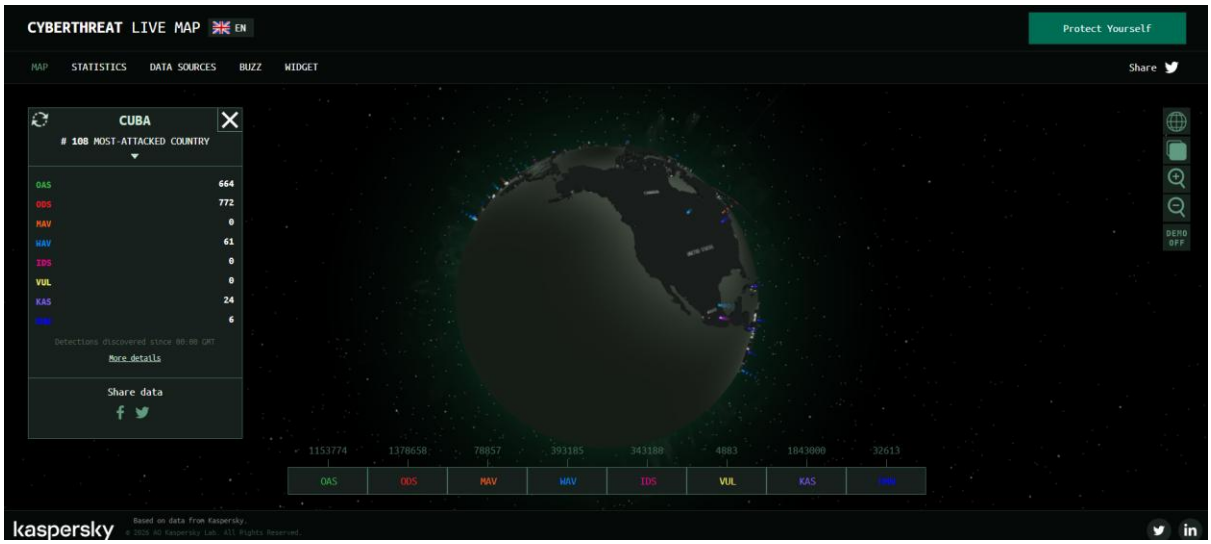

Prevention Controls

- Real estate firms hold high-value data: transaction records, client identities, regulatory filings — treat this as equally sensitive to BFSI data.
- Monitor dark web leak sites continuously for your organisation's name.
- Prepare a rapid-response communications plan for ransomware claims, whether or not they are verified.

3.Sign up for a free account on any online cybersecurity dashboard or threat intelligence tool (such as https://www.cybermap.kaspersky.com/ or https://threatmap.checkpoint.com/). Take a screenshot of the dashboard and list 3 types of information or metrics you see displayed.

Ans-

No.	Information/Metric	What it shows
1	Threat activity	Shows cybersecurity detections/activities occurring around the world.

2	Geographic information	Shows countries or locations associated with threat activity.
3	Threat categories	Shows different types/categories of detected cyberthreats.

**4.Write a simple phishing email template targeting users of a popular app (for example, 'Your Paytm account is suspended, click here to verify'). Highlight the suspicious elements that make it a phishing attempt.

Hint: Think about fake links, urgent language, or requests for sensitive info.**

Ans- Dear Customer,

We detected unusual activity on your PayFast account. As a security precaution, your account has been temporarily suspended.

To restore access, please verify your account within **24 hours** by clicking the link below:

https://example.com/payfast-verification

If you do not complete the verification process, your account may remain suspended.

Regards,
PayFast Security Team

Cybersecurity Awareness Training Example — Do Not Send

1. “URGENT”

→ Creates panic and pressure.

2. “temporarily restricted”

→ Tries to make the victim worry about losing their account.

3. “verify immediately”

→ Uses urgency to discourage careful thinking.

4. “within 24 hours”

→ Creates an artificial deadline.

5. Suspicious link

→ Could redirect the victim to a fake website.

6. “provide your account details”

→ Requests sensitive information.

5.Use ChatGPT or another AI tool to generate a simulated phishing email for a fictional food delivery app (like 'FoodiePal'). Copy the AI-generated email and explain which parts are likely to trick users and why.

ANS- dear customer,

We noticed unusual activity on your foodiepal account. For your security, your account has been temporarily restricted.

To restore your account, please verify your information within **24 hours** using the link below:

https://example.com/foodiepal-verify

If you do not complete the verification process within the given time, your account may remain restricted.

Thank you,

Foodiepal security team

cybersecurity awareness training example — do not send

- **Highlight suspicious elements**

Highlight these parts in the email:

Suspicious element	**Why it is suspicious**
“urgent”	Creates pressure and makes the user act quickly.
“unusual activity”	Creates fear that something is wrong with the account.
“temporarily restricted”	Makes the user worried about losing account access.
“within 24 hours”	Creates an artificial deadline.
Verification link	Unexpected links can lead to fake websites.
“verify your information”	Phishing emails may try to collect sensitive information.
